

**FIGURE 1.**

FIGURE 2.

Design, simulation of structures

Substrate preparation with appropriate layers

Patterning of first functional layer(s)

Nanoimprint, photolithography, e-beam lithography, holography

Addition methods

Subtraction methods

In-process monitor, characterization, metrology, etc

Performance assessments

Negative, ABORT ?

Positive

Add additional buffer layer(s), etching stop layer(s), and/or coupling layer(s)

Additional patterning of the layer(s)
